

Harrison House of Chester County Adds New Wing of Senior Apartments

Harrison House of Chester County is a popular place! To meet housing needs for local seniors, 32,000 square feet of existing space will be renovated to create 12 brand new specially designed units that will allow for both independent and assisted living accommodations enabling residents to remain in place as their needs change.

The renovated space will feature six units on both the third and fourth floors – all of which are located next to the wing’s elevators for easy access to the amenities and common areas. The units range in size from 450 to 650 square feet, each apartment featuring a full kitchen, spacious bath, and oversized windows that fill the rooms with natural light. Modern features such as engineered hardwood flooring and granite counter tops will enhance the décor.

“We’re very excited to push this project forward. The increase in units is much needed as our waiting lists indicate high demand for our services,” said Harrison Saunders, CEO of Harrison Senior Living. “Once completed, these new units will offer our residents even more of the affordable modern comforts they’ve come to expect from our community.”

The new accommodations are expected to be ready by early 2017. These competitively priced senior apartments will offer residents modern elegant living options with a beautiful view of the wooded hillsides and the expansive landscape of the Valley.
